ethical issues in modern medicine are of great concern and interest to all physicians and health care providers throughout the world as well as to the public at large jewish scholars and ethicists have discussed medical ethics throughout jewish history

traditionally the knowledge needed by physicians has consisted largely of medical science but in recent years ethical questions have been looming ever larger in everyday clinical practice doing right is a practical guide to decision making in those situations using dozens of real cases it analyzes the most common ethical problems encountered by physicians and medical trainees the many topics covered include truthtelling refusal of treatment confidentiality rationing of health care parents refusal of treatment for their children living wills the ethics of medical research and assisted suicide written simply and concisely with little philosophical or legal jargon doing right should be essential reading for medical students residents and practising physicians for those who teach bioethics it will be welcome as a practical and readable textbook

the subject of medical ethics is always current and offers an inviting theme particularly for anyone who has spent his life in medical practice but the subject of ethics is impossible to deal with unless one first asks its purposes therefore this book is divided into two parts the first comprehends theoretical considerations and the second pragmatic and empirical data on and discussions of current problems part one will be of greater interest to moral philosophers philosophers and historians of science and social scientists part two should have greater appeal to physicians medical students and medical planners nevertheless it is hoped that the latter will look into part one for the justification of the conclusions the author could reach on the material presented in part two likewise it will become obvious why it is believed the solutions of many if not most ethical dilemmas are not always discernible at a given moment in time also those who are more concerned with the theoretical material of part one might find its application to current real life problems interesting it should not be too much to hope that the entire book will appeal to many general readers the bio ethical problems presented are of frequent and growing personal concern and are discussed almost daily in the news media
